THE EZ-700 -- BIG NUMBERS ON THE SCREEN BOX. SMALL NUMBERS ON THE PRICE TAG

The **EZ-Screen 700** slips right in between the EZ-550 and the EZ-1000XL – offering the best of both portable screeners. First, it delivers the outstanding EZ-to-buy and EZ-to-own economy of the EZ-550, but with the added productivity of the 1000XL's bigger 6' x 5' screen box.

And it does it for \$15,900!*

With the larger, single-deck screen, the **EZ-Screen 700** is ideally suited to work with loaders with buckets ranging up to 1 ¾ yards. Adding to the **EZ-Screen 700**'s production capability is its site-to-site mobility. It's easily moved around anywhere in the yard to work on it's wheels -- as well as off site, with standard tow-hitch safety chains, trailer tires and lights.

And to squeeze out even more productivity, when mobility isn't a high priority, the **EZ-700** is easily mounted atop standard cement barrier blocks. The added height lets fines pile higher underneath, as well as the overage, cutting down on the cycles hauling them away. Plus the added height provides screener bump protection from the loader.

The **EZ-Screen 700** comes with just two options. Instead of a pull cord, order it with an electric start for \$593. And if diesel power is preferred, it's available with a Kohler 10 HP air-cooled unit for an additional \$1987.

(Notice how both options are quoted in odd numbers? That's because we price them the lowest we can.)

Naturally, the new EZ-Screen 700 comes with all the usual EZ-Screen features. Like our patented non-hydraulic screen drive for greater energy efficiency; a dual-stage air cleaner system; 2000 lb. incline adjustment jacks on all four sides; numerous screen choices; and a baked powder-coat finish. And most important – EZ personal service. designs, exclusive features, quality manufacturing and outstanding customer service.

Argus Industrial Co., L.L.C. has a policy of continuous product improvements and reserves the right to change specifications, designs or prices anytime without notice or the incurring of any obligations.
