EZ-PRODUCTIVITY... EZ-COME, EZ-GO MOBILITY

The EZ Screen 1000XL offers an EZ, safe, cost-effective method of reusing on-site materials, materials that cost money to haul away. With the EZ Screen 1000XL, these materials can be screened on-site, as needed. Only non-usable material gets hauled away. Plus you can cut the cost of trucked-in topsoil, gravel, sand, etc. The EZ Screen 1000XL is a proven method of making your operation more profitable.

"You put in dirt and out comes money."

Neil D., Scottsdale AZ

"If it isn't working on a site, it's on the way to a site."

"It goes where we need it"

Ralph H., Jackson WY

"I hope my competition doesn't get one."

Clyde F., Standish, ME

The EZ Screen 1000XL is match-mated to 1/2 to 1-3/4 Yard Loaders, and with its air-cooled 10 HP diesel engine, patented non-hydraulic screen drive and 6 ft. by 5 ft. double-deck screens, you'll make EZ work of all your screening needs. Just hitch the 1000XL to a 1 ton pick-up and you're ready to roll. The 1000XL has all legal lighting and electric brakes.

Once you're on-site, operation is one-man EZ, too. Wheels lift quickly to solidly position the machine, so it's ready to screen material, then lower for EZ transport to the next site.

The EZ Screen 1000XL is a product of Argus Industrial Co., manufacturer of the EZ Screen range of screening plants -- all offering innovation, productivity, versatility, and value through patented

Argus Industrial Co., L.L.C. has a policy of continuous product improvements and reserves the right to change specifications, designs or prices anytime without notice or the incurring of any obligations.
