

THE NATIONAL GOLF CLUB

THE CUPS DRIVE CAPE SCHANCK VIC 3939 AUSTRALIA

Good day Al,

I hope you and the team are well?

It has been a while since I have made contact, I apologise - We have been very busy and the year is going too fast.

The EZ-1200XL Screen has been working fantastic and we are the envy of many golf clubs in Australia. It has been six months since delivery and we have had no issues.

The quality of our sand we use to dust greens and fill bunkers is of the highest qualities and free of all stones.

I certainly think it is a big asset to have on the golf course: no longer do we waste sand or soil, it's stock piled and sieved and used on the golf course for divots and topdressing tees.

Please find attached a photo of it working on one our 3 fantastic courses.

Kind Regards,

Leigh Yanner
